Art Unit: 1746

1. Claim 4 stands withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on Sept. 11, 2006.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frankson (U. S. Pat. No. 6,076,538) in view of Bellman (U. S. Pat. No. 5,209,784). Re claims 1-3, Frankson discloses an apparatus for cleaning jewelry with a cleaning liquid (as at 11) and with steam (see abstract), comprising a basket (10) to contain the jewelry where the basket includes grasping means (18), and exposing the basket to a cleaning liquid that differs from the claims only in the recitation of the basket having a grasping member affixed to the interior thereof. Bellman is cited disclosing a jewelry clean comprising a basket, where the basket includes a grasping member (13, 18) and having the . It therefor would have been obvious to one having ordinary skill in the art to modify the basket of Frankson, to include grasping means as taught by Bellman for the purpose of preventing damage to the jewelry during the cleaning thereof.

4. Applicant's arguments filed Sept. 11, 2006 have been fully considered but they are not persuasive. In regard to the remarks on the applied prior art namely that the same fails to see the jewelry under the steam, please note the Applicant claims as

apparatus and the claims should define the invention in terms of structure rather than function. Claims directed to apparatus must be distinguished from the prior art in terms of structure rather than function. *In re Danly*, 263 F.2d 844, 847, 120 USPQ 528, 531 (CCPA 1959). “ [A]pparatus claims cover what a device is, not what a device does.” *Hewlett-Packard Co. v. Bausch & Lomb Inc.*, 909 F.2d 1464, 1469, 15 USPQ2d 1525, 1528 (Fed. Cir. 1990). (emphasis in original)

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
